**DOCKET NO. D-2001-062-2**

**DELAWARE RIVER BASIN COMMISSION**

**Aronimink Golf Club  
Groundwater Withdrawal  
Newtown Township, Delaware County, Pennsylvania**

**PROCEEDINGS**

This docket is issued in response to an Application submitted by Del Val Soil and Environmental Consultants, Inc. on behalf of Aronimink Golf Club to the Delaware River Basin Commission (DRBC or Commission) on October 24, 2012 (Application), for a renewal and approval of an existing allocation of groundwater and review of a groundwater withdrawal project. This docket was previously approved by the Commission on April 3, 2002.

The Application was reviewed for continuation in the Comprehensive Plan and for approval under Section 3.8 of the Delaware River Basin Compact. The Delaware County Planning Commission has been notified of pending action on this docket. A public hearing on this project was held by the DRBC on March 5, 2013.

**A. DESCRIPTION**

**1. Purpose.** The purpose of this docket is to renew the approval of an existing groundwater withdrawal project to supply up to 11.16 million gallons per month (mgm) of groundwater for irrigation of the docket holder's golf course from existing Wells Nos. 1, 2, 3 and A. Aronimink Golf Club is not requesting an increase in groundwater withdrawal allocation from that contained in its prior approval.

**2. Location.** The project wells are located in the Darby Creek Watershed, in Newtown Township, Delaware County, Pennsylvania. The wells are located in the Felsic Gneiss crystalline rocks of the Upland portion of the Piedmont Province.

Specific location information has been withheld for security reasons.

3. **Service area.** The project withdrawals will be used to supply water to the docket holder's golf course irrigation system. The golf course is located east of the intersection of St. Davids Road and North Newtown Street Road in Newtown Township, Delaware County, Pennsylvania.

4. **Physical features.**

a. **Design criteria.** The Aronimink Golf Club is an 18-hole golf course located on approximately 300 acres, and consists of 27 acres of fairways and tees and 1.5 acres of greens. The allocation of groundwater from Wells Nos. 1 through 3 and A herein will serve the golf course irrigation only; the golf course clubhouse is served by public water from Philadelphia Suburban Water Company.

The irrigation system is sourced from an on-site irrigation pond, which collects stormwater runoff from much of the course. Wells Nos. 1 through 3 and Well A will be pumped into the irrigation pond. The docket holder has a computerized irrigation and control system, which includes fertilizer application through the irrigation system and automatic soil moisture and weather monitoring to manage the application of water. The irrigation pond has a storage capacity of approximately 4.0 million gallons (mg).

The average and maximum demand is 0.180 million gallons per day (mgd) and 0.360 mgd, respectively. The docket holder does not estimate an increase in 10 years for the average or maximum daily demand.

b. **Facilities.** The docket holder's existing wells have the following characteristics:

WELL NO.	DEPTH	CASED DEPTH/ CASING DIAMETER	PUMP CAPACITY	YEAR DRILLED
A	120'	20'/8"	60 gpm	1925
1	322'	20'/8"	60 gpm	1966
2	160'	20'/6"	50 gpm	1995
3	350'	20'/8"	100 gpm	2001

All wells and service connections are metered.

The project facilities are above the 100-year flood elevation.

The irrigation system is presently not interconnected with any other distribution system. Potable water for the golf course clubhouse is supplied by Philadelphia Suburban Water Company.

c. **Other.** Wastewater from the site is conveyed to the Southwest Delaware County Municipal Authority sewage treatment facility which received approval most recently under Section

3.8 of the Compact by DRBC Docket No. D-1991-067 CP on November 4, 1992. The PADEP issued its most recent NPDES Permit No. PA0027383 on March 2, 2012 for this treatment facility. The treatment facility has adequate capacity to receive wastewater from the project.

d. **Relationship to the Comprehensive Plan.** The Commission included this project in the Comprehensive Plan on October 26, 1966 with Docket No. D-1966-212. On April 3, 2002, Docket No. D-2001-062 was approved, which decreased the total allocation of the golf course from 13.8 mg/30 days to 10.8 mg/30 days.

## **B. FINDINGS**

The Aronimink Golf Club has been in operation for more than 86 years without any reported water supply problems or complaints of interference to neighboring wells. The golf course is in an area that is presently almost completely served by public water, there are very few, if any, private wells in the area of the golf course.

The DRBC estimates that the project withdrawals, used for the purpose of golf course irrigation, result in a consumptive use of 90 percent of the total water use. The DRBC definition of consumptive use is defined in Article 5.5.1.D. of the *Administrative Manual – Part III – Basin Regulations – Water Supply Charges*.

The project does not conflict with the Comprehensive Plan and is designed to prevent substantial adverse impact on the water resources related environment, while sustaining the current and future water uses and development of the water resources of the Basin.

## **C. DECISION**

- I. Effective on the approval date for Docket No. D-2001-062-2 below:
  - a. The project described in Docket No. D-2001-062 is removed from the Comprehensive Plan to the extent that it is not included in Docket No. D-2001-062-2; and
  - b. Docket No. D-2001-062 is terminated and replaced by Docket No. D-2001-062-2; and
  - c. The project and the appurtenant facilities described in the Section A “Physical Features” of this docket shall be added to the Comprehensive Plan.
- II. The project and appurtenant facilities as described in the Section A “Physical features” are approved pursuant to Section 3.8 of the *Compact*, subject to the following conditions:

a. Docket approval is subject to all conditions, requirements, and limitations imposed by the PADEP, and such conditions, requirements, and limitations are incorporated herein, unless they are less stringent than the Commission's. Within 60 days (May 6, 2013), the docket holder shall provide written confirmation to the Commission that it has registered and reported with PADEP all surface and groundwater sources described in this docket in accordance with the Pennsylvania Regulations (Title 25 - Environmental Protection, [25 PA. CODE CH. 110], Water Resources Planning).

b. The wells and operational records shall be available at all times for inspection by the DRBC.

c. The wells shall be operated at all times to comply with the requirements of the *Water Code* and *Water Quality Regulations* of the DRBC.

During any month period, the withdrawals from the following wells shall not exceed:

WELL NO.	INSTANTANEOUS ALLOCATION (GPM)	MONTHLY ALLOCATION (MILLION GALLONS)
A	60	2.68
1	60	2.68
2	50	2.232
3	100	4.464

In addition, the total annual withdrawal shall not exceed 11.16 mgm or 66.96 mgy (11.16 mgm times 6 months).

d. The wells shall be equipped with a readily accessible capped port and drop pipe so that water levels may be measured under all conditions.

e. The project withdrawals shall be metered with an automatic continuous recording device that measures to within 5 percent of actual flow. An exception to the 5 percent performance standard, but no greater than 10 percent, may be granted if maintenance of the 5 percent performance is not technically feasible or economically practicable. A record of daily withdrawals shall be maintained, and monthly totals shall be reported annually by June 30, to the Bureau of Watershed Management, PADEP. Withdrawal records shall be available at any time to the Commission if requested by the Executive Director.

f. Each new water service connection shall include a water meter in accordance with the DRBC's Resolution No. 87-7 (Revised).

g. In accordance with DRBC Resolution No. 87-6 (Revised), the docket holder shall continue to implement to the satisfaction of the Bureau of Watershed Management and the PADEP, the systematic program to monitor and control leakage within the water supply

system. The program shall at a minimum include: periodic surveys to monitor leakage, enumerate unaccounted-for water and determine the current status of system infrastructure; recommendations to monitor and control leakage; and a schedule for the implementation of such recommendations. The docket holder shall proceed expeditiously to correct leakages and unnecessary usage identified by the program.

h. The docket holder shall pay for surface water use which exceeds the amount of water withdrawn from Wells Nos. 1 through 3 and A in accordance with the provisions of Resolution No. 74-6, as amended.

i. The docket holder shall continue to implement its Water Conservation Plan as approved by PADEP, and shall report to the PADEP on the actions taken pursuant to this program and the impact of those actions as requested by the PADEP.

j. The docket holder shall incorporate and implement reasonable conservation practices and measures consistent with efficient utilization of water resources.

k. No new water service connections shall be made to the premises connected to sewerage systems which are not in compliance with all applicable effluent limits contained in State permits and the *Water Quality Regulations* of the Commission.

l. Nothing herein shall be construed to exempt the docket holder from obtaining all necessary permits and/or approvals from other State, Federal or local government agencies having jurisdiction over this project.

m. The docket holder is permitted to provide the water approved in this docket to the areas included in Section A.3. Area Served of this permit. Any expansion beyond those included in Section A.3. Area Served is subject to DRBC review and approval in accordance with Section 3.8 of the *Compact* and the *GWPAR*.

n. Unless an extension is requested and approved by the Commission in advance, in accordance with paragraph 11 of the Commission's Project Review Fee schedule (Resolution No. 2009-2), the docket holder is responsible for timely submittal of a docket renewal application on the appropriate DRBC application form at least 12 months in advance of the docket expiration date set forth below. The docket holder will be subject to late charges in the event of untimely submittal of its renewal application, whether or not DRBC issues a reminder notice in advance of the deadline or the docket holder receives such notice. In the event that a timely and complete application for renewal has been submitted and the DRBC is unable, through no fault of the docket holder, to reissue the docket before the expiration date below (or the later date established by an extension that has been timely requested and approved), the terms and conditions of the current docket will remain fully effective and enforceable against the docket holder pending the grant or denial of the application for docket approval.

o. The issuance of this docket approval shall not create any private or proprietary rights in the water of the Basin, and the Commission reserves the rights to amend,

alter or rescind any actions taken hereunder in order to insure the proper control, use and management of the water resources of the Basin.

p. If any information demonstrates that the operation of this project significantly affects or interferes with any domestic or other existing uses of ground or surface water, or if the docket holder receives a complaint by any existing ground or surface water users within the zone of influence of the withdrawal, the docket holder shall immediately notify the Executive Director of any complaints by any ground or surface users within the zone of influence of the withdrawal, and unless excused by the Executive Director, shall investigate such complaints. The docket holder should direct phone call notifications of potential well or surface water interference or complaints of interference to the DRBC Project Review Section at 609-883-9500, extension 216. Oral notification must always be followed up in writing directed to the Executive Director. The docket holder shall provide the potentially impacted user(s) of wells or surface water supplies with copies of the correspondence submitted to the Commission. Any ground or surface water user which is substantially adversely affected, rendered dry or otherwise diminished as a result of the docket holder's project withdrawal, shall be repaired, replaced or otherwise mitigated at the expense of the docket holder in accordance with Section's 2., 6.D., 10.B., and 13.A. of the *GWPAR*. A report of investigation and/or mitigation plan prepared by a hydrologist shall be submitted to the Executive Director as soon as practicable. The Executive Director shall make the final determination regarding the validity of such complaints, the scope or sufficiency of such investigations, and the extent of appropriate mitigation measures, if required.

q. The Executive Director may modify or suspend this approval or any condition thereof, or require mitigating measures pending additional review, if in the Executive Director's judgment such modification or suspension is required to protect the water resources of the Basin.

r. For the duration of any drought emergency declared by either Pennsylvania or the Commission, water service or use by the docket holder pursuant to this approval shall be subject to the prohibition of those nonessential uses specified by the Governor of Pennsylvania, the Pennsylvania Emergency Management Council, PADEP, or the Commonwealth Drought Coordinator, to the extent that they may be applicable, and to any other emergency resolutions or orders adopted hereafter by the Commission.

s. Any person who objects to a docket decision by the Commission may request a hearing in accordance with Article 6 of the *Rules of Practice and Procedure*. In accordance with Section 15.1(p) of the *Delaware River Basin Compact*, cases and controversies arising under the *Compact* are reviewable in the United States district courts.
